Section #	C	NC	R	Narrative	To Be Corrected
415	X			Observed mice dropping behind washer in dryer. (Today) Person in Charge (PIC) stated that there was been a recent increase in signs of mice. I did not observe any food debris or exterior openings that could be attracting mice or allowing them to enter. Since there were previous signs in the pantry, stated by the PIC, that area should closed off and the door gap sealed at night to prevent entry of pests. Contact Certified Pest Operator for additional treatment.	Today/ 5-20-22
218		X		Observed warewash machine not being used due to damaged booster heater. Kitchen is using 3 compartment sink and chemical sanitizer as an approved alternative until repair can be made.	2 weeks
